

Experience

10/2016 – present Associate medical director, Phase5, GreyHealth Group

10/2016 – 3/2018 Healthcare consultant, Boston Strategic Partners

- Developed an analysis plan to assess the clinical and economic burden associated with hepatorenal syndrome to facilitate the launch of our client's product in the US
- Developed a series of abstracts, posters and publications for two clients' novel medications in preparation for their approval

03/2017 – present Course scientist, Seminars on Science, American Museum of Natural History

- Monitor and facilitate discussion among more than a hundred participants to date for two graduate-level courses for educators: "The Brain" and "Evolution"
- Provide ongoing assessment and feedback of learners

03/2016 – present Course director, "Medical Communication", New York University

- Co-developed a course for graduate students and postdoctoral fellows who are curious about Medical Communication as a non-academic career trajectory

10/2014 – 02/2016 Clinical researcher, Northeast Regional Epilepsy Group, New Jersey

- Conducted four clinical trials targeted towards adults and children with epilepsy
- Worked with more than a hundred patients and caregivers on study protocols
- Worked closely with medical science liaisons and sponsoring companies to ensure study compliance
- Established the Brian Tumor-related Epilepsy Research Consortium comprised of seventy-five adult and pediatric neurologists, neurosurgeons and pathologists; developed and maintained the Consortium website

08/2010 – 09/2014 Postdoctoral fellow, Nathan Kline Institute for Psychiatric Research, New York

- Developed research plans to understand the role of adult neurogenesis in epilepsy
- Contributed successfully to data collection and grant application that resulted in a grant funding of \$300,000/year

Education

08/2005 – 08/2010 PhD in Biomedical Sciences, University of South Carolina School of Medicine

- Dissertation title: "*Neuregulin/ErbB signaling in epilepsy*"; Dissertation advisor: Dr. David Mott, PhD
- Developed research plans to study the role of synaptic plasticity in epilepsy and wrote a successfully-funded pre-doctoral fellowship worth \$20,000/year
- Trained five undergraduate students and one Master's student
- Established lab protocols and constructed the field electrophysiology rig

07/2000 – 07/2005 Bachelors in Pharmacy, L.M. College of Pharmacy, Ahmedabad, India

Science Communication

09/2014 – present Science writer: International League Against Epilepsy (ILAE), The Tuberous Sclerosis Alliance

01/2014 – present Basic Science editor and science writer: www.epilepsy.com

Project Management

01/2018 Certified Project Management Professional (PMP)

05/2016 Organized a session entitled 'Train to Advocate' at NYU for forty doctoral and postdoctoral fellows to effectively advocate for their science

03/2016 Organized and managed 'Brain Awareness Week' in Harlem, NY with sixty volunteers and four hundred participants

08/2014 – 01/2015 Developed 'Kid MD' at Body Worlds Pulse, NYC, a program where one hundred students eight and older learned about the human body
